Aidan York

(770) 314-0638 • york_aa19@outlook.com • aidanayork.com • linkedin.com/in/aidan-york/

TECHNICAL SKILLS

Frontend: React, Next.js, Vite, Three.js, Tailwind CSS
Backend & Tools: Node.js, Git, Unix/Linux CLI, Azure DevOps
Languages: TypeScript, JavaScript, Java, Swift, Python
AI / ML: LLM fine-tuning (LoRA/QLoRA), Claude Code, Copilot
Mobile / Other: Xcode, Android Studio, SwiftUI

WORK EXPERIENCE

Horizon Cloud June 2025 – Present
Software Developer Remote

- Frontend developer responsible for building and maintaining a production React + TypeScript application, collaborating closely with product owners and backend engineers
- Maintained an interactive floorplan editor using Three.js, supporting drag-and-drop placement of objects within a 3D scene for spatial event layout design
- Implemented reusable frontend architecture, including modular components, dynamic forms, and shared UI patterns across the application
- Integrated AI tools into the development process, verifying all output to ship faster without sacrificing quality

Horizon Cloud May 2024 – July 2024
Software Developer Intern Remote (Company based in Naples, FL)

- Enhanced 3D scanning experience for Placez, an event planning software using THREE.js.
- Increased scan quality with machine learning techniques such as Gaussian splatting and NeRF; trained on an Ubuntu virtual machine.
- Automated 3D generation, reducing manual steps and speeding up processing with Python.

PROJECTS

AI Clinician Follow-Up Assistant *(Next.js, TypeScript, Python, PyTorch, Postgres)* September 2026 – Present
Developer Personal Project

- Building a Next.js app backed by Postgres and Drizzle ORM that runs automated patient check-ins after a patient starts a new medication, flagging conversations for clinician review
- Fine-tuned MedGemma 4B with LoRA/QLoRA into per-medication adapters, trainable on a single ~12 GB GPU
- Built the training pipeline on chat transcripts and medication data, with response-only loss, leak-free validation splits, and best-checkpoint selection.

Apple Vision Pro Game January 2024 – May 2024
Developer Athens, GA

- Developed and published a rhythm game on Apple's visionOS platform, releasing it on the Apple Vision Pro app store.
- Enhanced gameplay immersion by integrating hand tracking technology and musical elements, utilizing Swift, MusicKit, RealityKit, and SwiftUI.

EDUCATION

University of Georgia, School of Computing Athens, GA
Bachelor of Science, Computer Science May 2025
Certificate, New Media Certificate
