TECHNICAL SKILLS

Frontend: React, TypeScript, Next.js, Three.js, Tailwind, Vite

Backend & Tools: Node.js, Git, Unix/Linux CLI

Languages: JavaScript, TypeScript, Python, Java, C/C++

Mobile / Other: Swift, SwiftUI, Android Studio, Xcode

WORK EXPERIENCE

Horizon Cloud

June 2025 – Present

Software Developer

Remote

- Frontend developer responsible for building and maintaining the production React + TypeScript application, collaborating closely with product owners and backend engineers
- Maintained an interactive floorplan editor using Three.js, supporting drag-and-drop placement of objects within a 3D scene for spatial event layout design
- Implemented reusable frontend architecture, including modular components, dynamic forms, and shared UI patterns across the application
- Designed and developed multi-step workflows and modal-driven interfaces to support event creation, configuration, and management processes

Horizon Cloud

May 2024 – July 2024

Software Developer Intern

Remote (Company based in Naples, FL)

- Enhanced 3D scanning experience for Placez, an event planning software using THREE.js.
- Increased scan quality with machine learning techniques such as Gaussian splatting and NeRF; trained on an Ubuntu virtual machine.
- Automated 3D generation, reducing manual steps and speeding up processing with Python.

PROJECTS

AI Clinician Follow-Up Assistant (*Next.js, TypeScript, Python, PyTorch*)

September 2026 – Present

Full-Stack & ML Developer

Personal Project

- Building a Next.js app that runs automated patient check-ins after a new medication starts, exporting conversations for clinician review.
- Fine-tuned MedGemma 4B with LoRA/QLoRA into per-medication adapters, trainable on a single ~12 GB GPU.
- Built the training pipeline on synthetic and clinician-reviewed transcripts, with response-only loss, leak-free validation splits, and best-checkpoint selection.

Apple Vision Pro Game

January 2024 – May 2024

Developer

Athens, GA

- Developed and published a rhythm game on Apple's visionOS platform, releasing it on the Apple Vision Pro app store.
- Enhanced gameplay immersion by integrating hand tracking technology and musical elements, utilizing Swift, MusicKit, RealityKit, and SwiftUI.
- Leveraged Apple Vision Pro's unique capabilities to create an engaging user experience.

EDUCATION

University of Georgia, School of Computing

Athens, GA

Bachelor of Science, Computer Science

May 2025

Certificate, New Media Certificate
